

Summer School

”Ways of Development of the Energy Sector”

- Are you a Master student in engineering, technology, natural sciences or another energy-related field?
- Are you about to finish your studies?
- Are you interested in the practical challenges in the energy sector?

In that case, we would like to invite you to our

Summer School

Ways of Development of the Energy Sector: Modern Challenges!

August 13-27, 2016, in Yekaterinburg, Russia

The program is free for students,
including flights, accommodation, and common activities.

The two-week course will integrate technical and interdisciplinary lectures that relate to the energy system:

- Energy resources and renewable energies
 - Energy efficiency
 - Power grids and energy distribution
 - Specific features of the Russian energy system
 - The energy economy
 - Feasibility challenges
-
- International and intercultural exchange: students from Yekaterinburg, German universities and young professionals from companies that are active in the energy sector
 - Company presentations
 - Excursions and practical trainings

Interested?

Please send the following information via e-mail until **May 2**:

- A short, informal statement of interest (1-2 paragraphs) in English
- The participant form (one page, including a short CV)
